Death of Dr. Wm. Byrd.

Dr. Wm. Byrd, an old time practicing physician at Oxy, nine miles east of Doniphan, died last Friday about noon, after a lingering illness of tuberculosis, and the body buried on Sunday at the Arnold cemetery, one mile north of Gamburg. Rev. John J. Kennon, of the Christian church conducting the funeral services.

Dr. Byrd was a native of Cape Girardeau county, Mo., coming of an old family of that county. He was 65 years of age, and came to Ripley county 38 years ago, and began the practice of medicine, although he had practiced about two years in Cape county.

When coming to this county he settled at Gamburg, north of Oxy, and while living there married Miss White, daughter of Capt. White, and old citizen of that neighborhood. He leaves surviving him, his wife and one daughter, Mrs. C. M. Hughes, of Oiden, Mo., and some grand children, all his other children having died. Dr. Byrd was a gentleman with a large circle of acquaintances, and every person who knew him was his friend. He was a member of the Christian church and the Odd Fellows lodge, which order had charge of the funeral services at the grave, and the following remarks are furnished us by one of his brother Odd Fellows who attended from here.

Sunday morning Sept. 25th, three cars containing five men each left Doniphan for Oxy to attend the funeral of Dr. Byrd arrived just in time and Rev. John J. Kennon of the Christian church preached the funeral, after which the body was placed in charge of the Odd Fellows. We then drove about five miles north to the Arnold cemetery where a large crowd were waiting the arrival of the body. The coffin was opened and the last view was taken of the remains of Dr. Byrd, who had lived and practiced medicine in that vicinity for 38 years.

The coffin was closed and placed in the grave, then the Odd Fellows went through with their ceremony, the grave was filled and all returned to their homes feeling keenly the loss of a friend and brother.

The following lodges were represented: Furman, Poynor, Doniphan and Oxy.

Following is a simple way to test the purity of water: Put half a pint in a perfectly clean bottle and add a few grains of lump or loaf sugar. Make tight—a glass stopper preferred. Place the bottle in a warm, well lighted room. If it remains clear after an exposure of eight or ten days it is safe to use, but if it becomes turbid it is certainly impure and unsafe to drink.
